Clifton Springs Hospital Laboratory is under the overall direction of Dr. Joseph Hatem, MD, Laboratory Medical Director. Each laboratory section is under the technical direction and management of a Manager or Supervisor

Hematology offers routine testing with state of the art instrumentation and methodologies. In addition to the complete CBC/Differential and some special hematology tests, hematology also performs routine coagulation, and urinalysis.

In addition to general chemistry, the department provides therapeutic drug monitoring tests, endocrinology and blood gas analysis.

The Blood Bank is responsible for the storage and compatibility testing of blood and components and for special immunohematology studies. Products available are red blood cells, plasma, cryoprecipitate and platelets.
