The department is under the overall direction of Dr. Amanda Martin, MD, Laboratory Medical Director. Each laboratory section is under the technical direction and management of a Manager or Supervisor

Hematology offers routine testing with state of the art instrumentation and methodologies. In addition to the complete CBC/Differential and some special hematology tests, hematology also performs routine coagulation, and urinalysis.

In addition to general chemistry, the department provides therapeutic drug monitoring tests, endocrinology and blood gas analysis.

Our Microbiology Laboratory offers services in the following areas: aerobic and anaerobic bacteriology, serology, and molecular diagnostics. The following tests may be requested on a STAT basis: Gram Stain, Infectious Mononucleosis Screen and Rapid Group A Strep.

The Blood Bank is responsible for the storage and compatibility testing of blood and components and for special immunohematology studies. Products available are red blood cells, plasma, cryoprecipitate and platelets, including tissue storage.

Phlebotomy services are offered 24 hours a day, 7 days a week.
