Evenings:	3:00 p.m. - 11:30 a.m.	Full Testing	Full Testing	Full Testing
Nights:	11 p.m. - 7:30 a.m.	Full Testing	Full Testing	Full Testing

Unity Hospital Laboratory is under the overall direction of Dr. Nicole Durie, MD, Laboratory Medical Director. Each laboratory section is under the technical direction and management of a Manager or Supervisor

Hematology offers routine testing with state of the art instrumentation and methodologies. In addition to the complete CBC/Differential and some special hematology tests, hematology also performs routine coagulation, and urinalysis.

In addition to general chemistry, the department provides therapeutic drug monitoring tests, limited endocrinology and blood gas analysis.

The Blood Bank is responsible for the storage and compatibility testing of blood and components and for special immunohematology studies. Products available are red blood cells, plasma, cryoprecipitate and platelets.

Phlebotomy services are offered 24 hours a day, 7 days a week.

St. Mary's Laboratory offers limited on-site testing, in support of the Medical Oncology group at this location. This includes CMP, BMP, CBC, PT/APTT, and Blood Gas analysis.
